

# COVID-19 EXTRA MEASURES

1. You will be asked to sign a Health and Safety form before your visit to the Babylab.
2. We have implemented extra cleaning measures in all of our labs and communal areas.
3. You will be greeted at the main door and let in by the researcher you've been in contact with.
4. All visiting adults and children aged 11 or older will be asked to wear a mask (disposable masks will be provided). Researchers will wear masks or face visors as appropriate.
5. Researchers, adults, and children will sanitise their hands upon arrival. If you don't have a thermometer at home, we have one available for temperature checks.
6. Participants and families will go up the stairs or elevators separately to help maintain social distancing.
7. Some toys and books will still be present for babies and children to play with and they will be cleaned appropriately after each use.
8. During the experiment, social distancing will be maintained as much as possible.
9. We ask that you bring any snacks, water, and nappy changing necessities with you, though we will have back-ups upon request.
10. As we are limiting the amount of people in the building to increase safety, we currently cannot accommodate any siblings and other adults joining the session at this time.
