

HEALTH & SAFETY MEASURES

1. We will maintain extra cleaning measures in all our labs and communal areas.
2. Birkbeck strongly encourages all staff and students to be vaccinated and boosted according to NHS guidance.
3. You will be greeted at the main door and let in by the researcher you've been in contact with.
4. We recommend adult visitors wear a face covering while in our labs as you will be in close proximity with your researcher for an extended period of time. Disposable masks are available. We recognise everyone has different comfort levels and respect all decisions in this regard.
5. Researchers, adults and children will sanitise their hands upon arrival.
6. A selection of toys and books will be present for babies and children to play with. They will be cleaned appropriately after each use.
7. During the experiment, social distancing will be maintained where possible.
8. We ask that you bring any snacks, water, and nappy changing necessities with you, though we will have back-ups on request.
9. We are limiting the number of people in the building to increase safety.
10. If you or your baby/child are ill or feel unwell on the day of your visit, please reschedule your appointment. Please do not visit the labs if you or your baby/child have Covid, suspect you have Covid or are feeling unwell.
