Ostensive

Nonostensive

Exp. 1

Exp. 2

Gazing

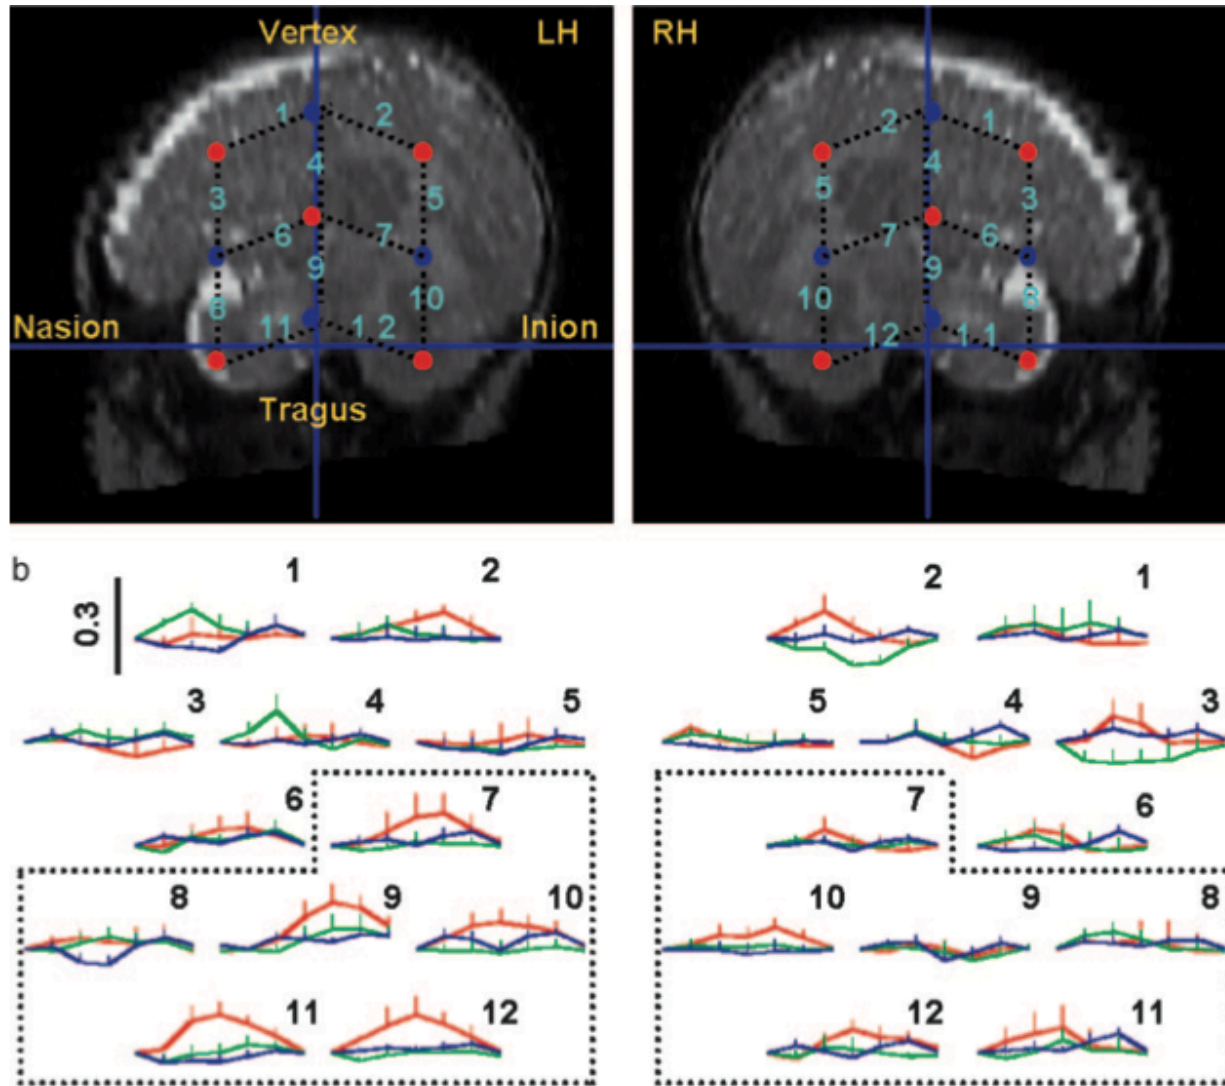

Brain activation to voices in infancy

(Anna, Evelyne et al., 2011)

Brain activation to language in newborns

(Pena et al., 2003)

Hearing babies with deaf mothers

Impact of experience on early communication

Social touch

Work in progress with
Laura Pirazzoli and
Alma Puts Keren

Audiovisual speech perception

Mercure et al.(2018) Dev Sc

Spoken and sign language development

Brain activation for spoken and signed language

Mercure et al. (2019)
Neurobiology of
Language

Eye contact and joint attention

Work in progress with
Przemek Tomalski and
Alicja Radkowska

Attachment and maternal sensitivity

Bowden-Howl, Dallos, Mercure
(submitted)

Visual attention to faces

Mercure et al. (2018) Frontiers in
Psychology

Brain activation for spoken language

Monolinguals

Unimodal bilinguals

Bimodal bilinguals

● HbO2 increase $p < 0.05$

Lessons learned from CBCD

- Multiple levels of explanation (observational, behavioural, cognitive, brain activation...)
- Multiple methods (PCI, eye-tracking, standardised assessments, brain imaging methods)
- Multiple populations
- Developmental trajectories
